

# Recommend Hardware for QuickBill

## Multi user Server / Head office

Particulars	Recommended Configuration
<b>Processor Speed</b>	2.0 GHz or Faster;
<b>RAM</b>	4 GB or more
<b>Hard Disk space</b>	160 GB
<b>OS</b>	Windows server 2012 or higher. Note : if the number of concurrent users and data is lesser, can work with compatible desktop operating system
<b>.NET Framework</b>	The installer will install required .NET Framework, if required
<b>Database</b>	The Installer will install SQL server Express Database, by default with a specific instance. If the number of Clients or concurrent users are more, standard or enterprise Version of SQL server is recommended for better performance.

## Single user / Clients

Particulars	Recommended Configuration
<b>Processor Speed</b>	2.0 GHz or faster
<b>RAM</b>	2 GB or more
<b>Hard Disk space</b>	40 GB
<b>Printer</b>	Any O/S compatible Printer for Bill Printing and Reports. WE support multiple printers including network printer. For barcode Printing, thermal barcode printers are supported.
<b>OS</b>	Windows 7 service Pack 1 or higher
<b>.NET Framework</b>	The installer will install required .NET Framework, if required
<b>Database</b>	The Installer will install SQL server Express Database, by default with a specific instance.

**Note:** The hardware required to install QuickBill at your business depends on a number of factors. They include the number of items that would be handled and the transaction volumes of that business. At your head office, the requirements will depend upon the number of concurrent users, and overall volume of data. For larger implementations need to have better hardware with provision for upgradation with SQL server Standard Edition or higher.
